

NewFunds GOVI ETF

Minimum Disclosure Document - 28 February 2023

Portfolio objectives

The GOVI ETF tracks the price return version of GOVI Index, an index consisting of bonds issued by the South African Government which includes only those issues in which the Department of Finance obliges the primary dealers to make a market and constituting the GOVI. The GOVI is calculated daily by the JSE.

The GOVI ETF is suitable for investors seeking low-cost convenient alternatives to traditional non-listed products. The GOVI ETF can act as a building block for investors to use when constructing their own portfolios.

Income distributions

Month	Gross (cents per unit)	Net (cents per unit)
January 2023	222.52	222.52
October 2022	175.30	175.30
July 2022	179.53	179.53
May 2022	119.84	119.84

Annualised return is the weighted average compound growth rate over the period measured. Performance is calculated using the NAV of the Portfolio and represents only past performance. An individual's performance may differ to that of the portfolio as a result of initial fees, brokerage, actual investment date, dividend withholding tax and income reinvestment date. The reinvestment of income is assumed to be effected on actual distributed amount net of withholding taxes; and on distribution payment date.

Portfolio details (cont.)

Management Fee	0.32% ¹
Annualised TER	0.32% ²
Annualised Transaction Charges	0.00% ³
Annualised Total Investment Charges	0.32% ⁴

Notes

- Management fee is the fee which the manager charges for managing the portfolio and is inclusive of VAT. Where the TER is lower than the management fee, the Manager has subsidized or waived allowable expenses. Such subsidies and waivers are not guaranteed perpetually and a higher TER may incur in the future.
- The Total Expense Ratio (TER) is expressed as a percentage of the daily NAV calculated over a rolling 3 year annualised period.
- The Transaction Cost of the Portfolio is expressed as a percentage of the daily NAV and is calculated over a rolling 3 year annualised period.
- The Effective Annual Cost (EAC) measure is a combined sum of the TER and Transaction costs. The fees above are as at 28 February 2023.
- Scrip Lending - The portfolio does engage in scrip lending.

Glossary of terms

Annualised Return - The weighted average compound growth rate over the period being measured.

Annualised Risk - A measure of how much the investment return varies from its average over time.

Constituent Security - A stock which is part of a larger portfolio.

Drawdown - A measure of the deterioration of the portfolio from its historical peak (highest level of the fund), measured since the relevant reference point.

Exchange Traded Funds (ETF) - A listed instrument listed on the JSE whereby the investor essentially owns a proportionate share of the underlying investments held by the Portfolio.

Net Distribution - Accrued income and dividends less portfolio expenses, which is distributed to investors.

Portfolio Risk - A measure of the risk inherent in a portfolio incorporating individual stock volatility as well as the covariance structure of stocks in the portfolio.

Scrip Lending - The lending of securities from one party (being the holder of the securities) to another party (the borrower). The borrower provides collateral for the securities borrowed.

Total Expense Ratio (TER) - This is the total costs associated with managing and operating an investment (excluding financial planning). These costs consists primarily of management fees and other operational expenses such as audit and custody fees. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs.
